**Absolutely Dot (Ag Ch) [B] [BC]**

Born 10/07/1998

Added to database 10.03.15

Lethans Maximillion	Roy (ISDS)	Source	Breeder & Owner: Dr Toni Lock
	Lethans Kip	Details	Fitting began aged 5 and half years. NOT Vet. Confirmed as Epilepsy. Medication: None.
Pipped at the Post (ISDS Pip)	Unknown	Dot only ever had ONE 'almost fit', that came on 60 minutes after whelping. Diagnosed as pre-eclampsia. Treated with s/c calcium and magnesium for 2-3 weeks. Never fitted previously, and no further fit-like episodes afterwards. At age 14-15, started having drop attacks, where she would lose consciousness after making strange howling noises.	
	Unknown	Diagnosed as secondary to poor cardiac function, and she stopped having them after starting digoxin. Spayed. Died of old age.	

Dog named above: Sire: 6 puppies in 2 litters (Source: Anadune); 6 puppies in 2 litters (Source: KC)

Dog named above: Dam: 1 puppy in 1 litter (Source: Anadune); 1 puppy in 1 litter (Source: KC)

**Altricia Stay By Me [D] [BC]**

Born 28/07/2012

Added to database 18.02.14

Sh Ch Altricia My Spot On	Altricia Red Return	Source	Owner: Karen Fulker
	Altricia Lady Margaret	Details	Fitting began aged 6 months with focal seizures. Medication: Pexion 200mg 2 x daily. Had obvious focal seizures at 6 months 9 months 10 months and 14 months.
Sh Ch Altricia Love A Lot	Sh Ch Miraje The Storm Lord JW	May also be having more subtle focal seizures that aren't spotted. Brain MRI in October 2013 ruled out brain tumour. Blood tests all normal. Bladder X-ray done as each episode dog has leaked urine bladder normal. Initially fed on Arden Grange, now on Burns. No noticeable change in fits since onset. Entire. Statement from the breeder "if you feel the need to put this on the data base you must state that siblings parents grandparents etc have never had a problem ."	
	Altricia Wish For Gael

**Andraste of Robate (ISDS 286479) [B] [BC]**

Born 06/08/2006

Added to database 30.04.14

Detania Da Capo (ISDS 266581)	Sh Ch Sheltysam Swagman (ISDS 204352)	Source	Owner: Rose Bate
	Magreena Dulcimer Among Detania (ISDS 251192)	Details	Fitting began aged 4 years. Vet confirmed as Epilepsy. Medication: Phenobarb 60mg twice daily Bromide 350mg daily Taurine twice daily. Fed on Arden Grange Lamb & Rice when fits started, after fits controlled changed to CSJ when had more fits these reduced when back on Arden Grange. Fits initially controlled on Phenobarb. More frequent fits 1 year later bromide added more fits 6 months later & bromide increased. There seems a stress component as she increased in fitting frequency when owner had serious illness attacks. Also worse when returned to sheep work. Spayed after fitting started - no effect.

**Anfields Touch Of Cian-Ti [D] [BC]**

Born 26/09/2007

Added to database 29.05.14

Paddy Gwynion (ISDS 280634)	Glen (ISDS 244809)	Source	Owner: Gemma Henshaw
	Bess (ISDS 242897)	Details	Fitting began aged 4 years. Vet confirmed as Epilepsy. Medication: None noted. The fits started completely out of the blue just as he was approaching his 4th birthday.
Kelly Gwynion (ISDS 286252)	Lad (ISDS 231344)		He had one fit in the early hours of the morning, checks were done at local vets and they couldn't agree what had caused it, a week later another fit followed by his body starting to shut down, laboured breathing and no energy. taken to Potters Bar vets hospital, kept in for a week, one small fit whilst he was there, they said sudden onset epilepsy, bought him home as they said he might not fit again. He had been home from Potters Bar for 2 weeks with no fits, then had a major fit in his crate whilst we were out and died after choking on his own vomit. Roughly 8 weeks after his first fit. He was neutered at least two years before the fits started .

Jack Of All Trades (ISDS 232260)	Red (ISDS 179688)	Source	Owner: Amanda Liversage
	Lill (ISDS 214611)	Details	Fitting began aged 3 years 10 months. Vet confirmed as Epilepsy. Medication: He is not longer with us, however was on Phenobarbital 120 mg twice daily and Epilease (though I forget the amount) Rectal diazepam in 5mg increments every 15 mins to try to stop seizure cluster once it started. They increased over the course of 14 months. He had petit mals, they lasted about 3 mins with a recovery period that was always blurred with another fit. Would regularly have up to 50 fits over 3 or 4 hours before the levels of diazepam were high enough to stop him. He was neutered after epilepsy was diagnosed. Increase of severity and frequency went up more quickly after neutering. He had a cluster of fits that I didn't see the start of - temp went up too high, brain damage. PTS 2 days later when no sign of improvement in neuropathic damage. No known trigger for fits and always fed raw.

### Detania Glittering Pride [B] [BC]

Born 29/06/1997

Added to database 25.07.14

Detania Cosworth	Detania Singing The Blues	Source	Owner: Tracey Saunders
	Detania Keira	Details	She started having epilepsy at around the age of 4 or 5 I think, with one fit which lasted probably less than a minute.
Detania Faith Moves	Detania Araz (ISDS 162879)	They never actually lasted more than a minute I would guess, just seems a long time at the time. They gradually increased until about 18months - 2 years months later when she had 5 in one day, the vets then put her on medication - Phenobarb? I believe. This stopped the fits until the dosage needed correcting. Megan had to have regular check ups every 6 months (I think) and the medication did gradually increase. Megan actually contracted Bone Cancer in her shoulder which sadly ended her life at the age of 10 1/2. That's about all the information I can give you I'm afraid - hope it helps in some way.	
	Detania Lady Lucy Lockett

UK BC Fitting Database

Grenaby Skeel Graih [D] [BC]

Born 15/09/2011

Added to database 11.09.13

Ludgate Red Laser	Woodsorrel Spectre AW	Source	Owner : Karen Westcott (information sent mid May 2013. Discovered 11/09/13).
	Firelynx Jumanji at Ludgate	Details	Fits began aged 18 months. Vet confirmed as Epilepsy. Medication: Pexion 400mg twice daily. Initially fed on skimmers kibble then once the fitting started, a home prepared diet of brown rice, potatoes and vegetables with raw meat( to try and reduce gluten, corn, soy and casein as per the GARD diet)
Grenaby Editors Choice	Grenaby Tucker	This seemed to help for a while, with improving gaps between fits until last week, when he had several fits and he became critically ill at the weekend with cluster fitting. Fits have change in frequency. We had got him up to 17 days between fits, and had wanted to try and manage it naturally ( without drugs) but that all changed last week as described above and the treatment was necessary to save his life. After we got him, we heard that the dogs ( not the bitches) in the previous litter had all started to fit. So we opted for an early castration at 5 months. We are very lucky that he is still with us, but it was devastating to see him so poorly. He was in intensive care for 3 days and has been home for 3 days now, improving visibly by the hour. If I can provide you with any additional information, please do not hesitate to shout.

UK BC Fitting Database

Gwynfair Marc My Words [D] [BC]

Born 19/12/2011

Added to database 25.08.15

Wildblue It's The Business	Am Ch Kybota Wildblue Rhythm	Source	Owner : Julie Duesbury
	Wildblue Eternal Dream	Details	Fitting began aged 2 years 2 months. Vet confirmed as Epilepsy. Medication: Initially Pexion, after 6 weeks Libromide was added This combination was satisfactory for a while but then fits resumed, if anything worse than previously, he then had Epiphen and also Diazepam. Neutered after onset of fits.
Trevellis She's A Gem at Gwynfair	Altricia Shadey Blue	From the outset His fits were severe and caused significant memory loss and required a lot of retraining etc. We had a honeymoon period when we thought that the medication was going to control the seizures but when they resumed each time he had one it was severe and the recuperation period took longer. He had a very severe cluster of fits which effectively wiped his memory and character. He was very close to death but pulled through. We taught him to walk etc again and after 6 weeks he was basically ok. He was a different dog but he liked us and was content in his life. He then had another severe seizure during the night which left him parylised from the shoulders. We then made the decision that he should be pts. 1st June 2015 aged 3 yrs and 5 months.

Gwynfair You Were Made For Me [D] [WS]

Born ??/??/????

Added to database 11.09.13

Fenom Full 'O' Fun	Summertime Sweep	Source      Owner : Pauline Wynn (information sent end April 2013. Discovered 11/09/13).
	Majacabus Oso Tricky.	Details Fits began aged 1 year 10 months. Vet confirmed as Epilepsy. Medication: He was initially prescribed just Epiphen, but over the next 5 years his medication was gradually increased to try to control his fitting. From his first fit, he didn't have another for 18 months then the frequency increased until roughly every 3 weeks by this time he was on 120mg Epiphen at 8am and 8pm, 300mg galbapentin at 8am, 2pm and 8pm, 500mg Keppra at 8am and 8pm, and 250mg at 2pm.
Tyzemade Maggie May of Gwynfair	Whatknow Rockin Symphony	He was on Autarky at the onset of the fits but as the intensity increased, he was moved to a completely natural diet of chicken and vegetables. Much research was carried out into the ingredients of manufactured dog foods, and it was found that certain things can be a trigger factor to epilepsy so knowing what was in his food was important. He had cluster fits over 2 days on the first occasion and was given medication to try to stop the cluster, it was then 18 months before his next cluster fit. His next fit was then 3 months later, after which the frequency increased from around the age of 4 until the fits were happening every 3ish weeks. It was often a cluster of 3 or 4 fits over a couple of hours, but he needed veterinary assistance on 2 occasions where he was anaesthetised to stop the fitting as the episodes had continued over 24 hours or more. NOT neutered as the vet advised against him being operated on because of the risks with his epilepsy. Dog is no longer alive. He went into a cluster fit episode that could not be stopped with medication and it was felt that he had suffered enough and had had his last fit. He was 6 years and 10 months old.

**Holmelyne Mintisa Connie [F] [BC]**

Born 24/10/2012

Added to database 16.07.15

Holmelyne Cumbria Aukley	Canen Jasper at Holmelyne	Source	Owner : Karen Lang
	Holmelyne Witch Widow	Details	Fitting began aged 2 years 7 months. Vet confirmed as Epilepsy. Medication: phenobarbitone 60mg 2 x day, now increased to 90mg 2 x day, plus potassium bromide 400mg 1 x day and keppra for 5 days if seizures (4 x 500mg) . Fed on Advanced Formula for Working Dogs dry food, have not changed this since diagnosis. Too early to say if fits have changed at all, first seizures 6 in 36hrs, each lasted around 1-1.5 mins, generalised with legs paddling, teeth chattering and unconscious. Next ones 3 wks later, 6 in 3.5hrs, shorter duration, 30secs to 1 min, semi conscious, back arched and rigid but shaking body, jaw rigid and wide open, looked more traumatic. Spayed after first season around 9 months

	Fran (ISDS 219858)	Details <span style="float: right;">Fitting began aged 2 years. Vet. Confirmed as Epilepsy. Medication: Epiphen 3-4x daily, Libromide 3-4x daily, Keppra 500mg 3x daily, Diazepam. Initially single</span>
Floss (n/r)	Ben (n/r)	fits, becoming frequent clusters. Hospitalised many times. Since introduction of Keppra, no clusters. Neutered. <b>UPDATE</b> This is an update for Jess. Unfortunately she went into status epilepticus on 10th Sept 2014 and, despite 24 hours at the vets trying to bring her out, she carried on fitting and the decision was made to put her to sleep. She fought a brave fight with cluster fits every couple of months for the last 2 years but we thought that enough is enough and her battle with epilepsy is over. Between times she was a happy little dog, her tail was always wagging and she loved doing fun agility and fun flyball. She is missed enormously.

UK BC Fitting Database

**Marshonelle Howdylicious [D] [BC]**

Born 05/11/2012

Added to database 30.04.14

Rosmarinus The Chocolatier	Rosmarinus Jaffa	Source	Owner: Michaela Smith
	Rosmarinus Demerara	Details	Began fitting at age 13 months. Vet confirmed Idiopathic Epilepsy. Medication: 40mg of Pexion twice a day. He was flea treated a week before, to which he was stressed at time of doing so and was off colour from that point up to first fit.
Marshonelle Izzie	Rosmarinus The Rainmaker	He was feed on mainly raw with some dry food. Had an allergy test done and he is allergic to chicken, duck, wheat and gluten. Changed to pure BARF diest minus the chicken and duck. In himself he became brighter when food was changed, he started to grow again, coat became fuller. His fits have become less frequent but this may coincide with having all possible test done, including an MRI scan and spinal fluid tap, to diagnose epilepsy and being put on the right medication. When they first started he had several in a week, once food changed these decreased and since medication started they have decreased further. Longest between fits has been 31 days.	
	Amazin Gracie

UK BC Fitting Database

**Marshonelle Switch'N It On [D] [BC]**

Born 05/11/2012

Added to database 02.09.13

Rosmarinus The Chocolatier	Rosmarinus Jaffa	Source	Owner: Roberta Summerfield
	Rosmarinus Demerara	Details	Began fitting at age 8 months. Vet confirmed Idiopathic Epilepsy. No identifiable cause for fits. Medication: Pexion 400mg twice daily. One small fit on 28.06.13 whilst asleep on sofa lasting less than a minute, recovered within 10 mins. No further fits until 9th July, when found fitting in the morning. Rectal Diazepam given. Fitted again
Marshonelle Izzie	Rosmarinus The Rainmaker	same day at 3pm, same treatment, but 4 further fits so taken to vet and kept in overnight and stabilised. Brought home on the 10th but fitting again between 11am and 2pm so rushed back to vet and again kept in overnight and sedated, Phenobarbitone and on a drip. Prognosis was poor at this time. Brought home on the 13th July, Pexion 400mg twice daily. Recovery seemed unlikely but daily improvements noted - motor function, spatial awareness, vision, recognition. The following 22 days charted phenomenal progress in physical and mental capabilities, by 1st Aug he was at 95% of his previous levels of training for Obedience. On 2nd August he had another brief fit at 10pm (similar in length and recovery to his first) with the same outcome. At some time between 3am and 4am on the 4th August he suffered a major seizure, rectal diazepam x 3 was administered but to no avail, and he passed away shortly afterwards before further veterinary attention could be sought.

UK BC Fitting Database

Remajak Somerset Morn [D] [BC]

Born 11/06/2013

Added to database 04.12.14

Altricia Double Dare To Arroddare	Altricia Mister Consistant	Source Breeder: Christine Timms
	Altricia Lady Madge	Details Fitting began aged 16 months. Not vet confirmed as Epilepsy. Medication: see below. First fit 28.10.14 - seizure in the afternoon, followed by a slow but full recovery to normal state. Second fit 29.10.14 at 7am. Seen by the vet after each seizure and blood tests undertaken. Vet advised diagnosis of idiopathic epilepsy at this stage but as yet no MRI or spinal tap has been carried out. He is otherwise fit and well with no further
Borderbeau Blithe Spirit At Remajak	Locheil Travellin' South To Borderbeau JW SHCM	seizures as of 2.12.14 . Initial course of Diazepam for approximately one week; treated with Epiphen twice daily from day of second fit for four weeks. Bloods have been sent to Epiphen to assess viability of phasing out medication.
	Locheil First To Finnish At Borderbeau	24.9.14 castration under general anaesthetic; vet treated with Advantage for possible fleas same week; 1.10.14 first year vaccination; 25.10.14 routine worming with Panacur. He is otherwise fit and healthy. All breeders/owners directly connected were informed immediately with sire/dam owners agreeing to wait for completion of initial four week treatment plan before submitting to database; dam & littermates will never henceforth be bred from. DNA to be submitted in due course. Fed James Wellbeloved Turkey & Rice; no change before or after seizures. Neutered on 24th September, before onset of fits. <b>Update</b> 1.5.15 Bryn suffered a seizure at 10.30pm. Recovery time was quicker than the initial two seizures last October but he lost vision for 15 minutes. 25 minutes after the seizure he took his ball to his owners to ask for a game. At the time of the seizure, his owners report that his epiphen dose had been reduced gradually to 1/4 tablet each day (as he had suffered no further fits after the initial two) with the plan to take him off meds altogether in another week. However, their vet has now advised that the dosage should be returned to 1/2 tablet each day.

Rosmak Classic Choc [D] [BC]

Born 06/08/2009

Added to database 30.06.14. Updated 20.07.14 updated 2.10.15

Rosmarinus The Chocolatier	Rosmarinus Jaffa	Source      Owner: Eileen Restell
	Rosmarinus Demerara	Details      Fitting began aged 4.9 months. Vet confirmed as Epilepsy. Medication: Skull Cap Valerian. Silica Agorica & Ignatia. Epitaur. Nothing unusual happened although breeder says could be any number of influences such as sofa, underfloor heating
Rosmarinus Eclipse	Rosmarinus The Werryman	river water etc. No relevant injury but has been treated by chiropractor of misaligned pelvis in past two weeks. Fed on Raw food - minced chicken carcass/lamb chicken wings, lamb ribs, tripe, minced vegetables, some soaked oats - no change in food fed. DE & turmeric paste. 4 fits so far each approximately 10 days apart. Medication commenced 23 June 14 - too early to determine. MRI scan to be carried out 2 July. Entire. <b>20.07.14</b> Up date to Rosmak Class Choc status. Kez had MRI & Spinal Tap at R Vet College 2nd July, result 'Unremarkable' therefore epilepsy confirmed.
	Rosmarinus Loganberry	Epiphen 60mg twice a day. Due to the way the fitting started Consultant thought that I should expect Kez to fit every couple of weeks but so far he has been clear and in good health showing no effects of the drug. Consultant did not feel that I should go through the same procedure with my other, related, BC as the result would likely be the same. update 2.10.15: Kez, after starting medication in July 14 very few isolated fits but they resumed in Sept 15 as clusters - at least 6 in 24hours. Vet added Libromide, 325gms a day after a 5 day loading period. Also Epiphen 90 2 x daily. clear since 4 Sept Food prior to onset: No change in diet but have now removed all traces of dairy, gluten & grain. Neuter: Entire Frequency: No fits from July to Feb after starting medication. Comments: DNA to AHT & Finnish study. Also tested for B12 - clear.

## UK BC Fitting Database

### Rosmak Fortune Teller [D] [BC]

Born 16/05/2012

Added to database 18.07.14

Rosmarinus Gin Cooler	Ag Ch ForByFor Turbo Diesel	Source	Owner: Natalie Hynes
	Rosmarinus Pimms	Details	Fitting began aged 12 months. He had had puppy vaccinations but not old enough to have needed booster yet. No injuries or changes to diet, not recently had flea or worm treatments. Entire. He was his usual happy, lively self when we left the house
Rosmarinus Eclipse	Rosmarinus The Werryman	drove to a show and was acting 'odd' when we arrived. He had drool hanging from his mouth and seemed a little vacant. Took him for a walk, he seemed spooked which wasn't his personality, went to put him on lead and he fell to the floor fitting. Lasted approx 8-10 minutes. No help available at show, phoned vets who recommended taking him in, said as it was his first fit would be highly unlikely to have another straight away. Travelled in van with myself, he didn't return to his usual self and started fitting again within minutes. I had a vet on speakerphone, the fits were huge and he was struggling to breathe, followed directions and tried to resuscitate. He very sadly died. Not confirmed as epilepsy as didn't want a postmortem but the vet said it was highly likely due to his physical appearance.	
	Rosmarinus Loganberry

## UK BC Fitting Database

### Rosmarinus Golden Crown [D] [BC]

Born 22/07/2011

Added to database 18.05.2014. Updated 20.07.14 updated 2-10-15

Rosmarinus Brimstone	Heathgate Grit	Source      Owner: Eileen Restell
	Rosmarinus Bright Star	<p>Details      Fitting began aged 2 years 8 months. Vet confirmed as Epilepsy. Medication: Homeopathic meds. Skullcap Valerian/Silica/Thuys Verm x. Nothing unusual happened that might have caused the fits although the breeder suggested that sleeping on the sofa might be the cause.</p> <p>- there seems to be many fitters in breeders lines. Fed Raw - Natures Menu No change to diet since fits began. First episode lasted approximately 90 seconds with full recovery after 30 minutes. Subsequent episodes - 5 over 36 hours much more intense and lasting around 5 minutes each time. Neutered around 16 months - First fit 9 April 2014 so neutering not thought to have had any impact. <b>20.07.14</b> Update to Rosmarinus Golden Crown. Further cluster fitting 7 weeks after previous episode, vet have prescribed Pexion 400 2 x daily as homeopathic medication was not effective. I discussed Switch's condition with Consultant at R Vet College - it was his opinion, that due to pedigree history that there would be no benefit an MRI scan and spinal tap. If severe cluster fits in future has recommended Keppra be prescribed. Otherwise Switch is in good health currently. Update 2-10-15 Fitting resumed in April &amp; escalated in intensity and then on a daily basis - cluster fits. Increase in medication had little effect. After discussion with vet he was put to sleep to prevent further suffering. Prescribed medication: Ephiphen - 120 mgs x 2 daily. Neutered DNA swabs to AHT and Finnish study. Tested for B12 - clear.</p>

### Rossami Chaotic Wizard [D] [WS]

Born 22/6/1998

Added to database 27.02.13 Updated 20.10.13

Joem Jamie Meadow Joy	Carfeld Angus	Source	Owner: Alison Farrow
	Joem Jylly	Details	Fitting began aged 8 years 1 month. Vet confirmed as Epilepsy. Medication: Epiphen. Started on 30ml twice a day and progressed to 45ml which seemed to work.
Golly It's Molly at Rossami	Glen	Almost all fits happened immediately after running & diving on a ball or tuggy. As he lifted his head with toy/ ball in his mouth he stiffened, and then 'keeled over' into a fit. Over the course of first month I took him to a McTimoney nurse who found that several vertebrae were slightly misaligned in his back / neck. Stopped throwing a ball for him after the third fit. That, together with medication virtually stopped the fits. He only had one or two a year after that, usually when he dived after someone else's ball! Neutered years before onset of fits. Died Cancer of the spleen in April 2012.

UK BC Fitting Database

Sam [D] [BC]

Born May 2007, died May 2013

Added to database 21.06.14

Unknown	Unknown	Source      Owner: Joanna Mabey
	Unknown	<p>Details</p> <p>Fitting began age 3 years. Vet confirmed as Epilepsy. Medication: Epiphen. Nothing unusual happened that I can think of I did notice it initially happened after we had been out and we got caught in the rain. Like he had caught a chill it happened often after a soaking the vet said it wasn't connected. I'm not so sure.</p>
Unknown	Unknown	<p>After diagnosis at Bath Vet hospital where he had an MRI and I think a lumbar puncture he was Initially given just Epiphen strength and dose varied then also given Lobramide can't remember strength when fits continued. The fits did change even though he was on medication. The fits didn't last as long and I could tell when he was about to have one, or if he had had one when he was home alone. Usually when he was sleeping then he would wake, his head would shake he would fall over and his back legs would move as if he were running his front legs would be stiff. Was fed on Bakers complete. A lighter diet was offered after fits although he was usually starving when he came around . He gained weight so we were advised to give him a weight control food there was no change in fits. He fitted off and on for just over a week in clusters. We arrived home one evening to find that he had died. The vet said it was a grand mal seizure that only instant medication could have saved him and he would not have known what was going on. He was neutered before the fits began.</p>

**Seve (not registered) [D] [WS]**

Born approx 02/11/2007

Added to database 11.09.13 Updated 20.10.13

Unknown	Unknown	Source      Owner: Julia Atkinson
	Unknown	Details      Fitting began approx age 2 years. Vet confirmed as Epilepsy. Medication: None. On keeping a diary fits always on around spot on flea treatment - not now used and fits a lot less severe and less frequent, plus have changed his diet to part raw.
Unknown	Unknown	and don't give any vet meds unless v necessary (use alternative and herbal) and ALWAYS check they are suitable for dogs with seizures. Fits always in a morning after a deep sleep but have been able to halt them when I see and hear the signs (vomiting noise and lip licking)and talk to him and stroke him gently. Now fed part raw part JWB kibble. Did read an article about giving frozen vanilla ice cream immediately after a fit. Have only tried this once but was AMAZING at bringing him round very quickly. Fitd have gone from every 3/4 months to every 5/6 months (last time was 5months 22 days) and are less severe now lasting less than 1 min and recovery time afterwards a lot quicker (due to Ice cream?). Dog came from a rescue and was neutered before owner got him.

UK BC Fitting Database

Smudge [D] [Collie]

Born 19/10/2013

Added to database 16.07.15

Unknown	Unknown	Source      Owner: Joanne Mulholland
	Unknown	Details Fitting began aged 13 months. Vet confirmed as Epilepsy. Medication: Epiphen an increased to 2 twice daily 60mg, After 4 months given Libromide, which only made him lethargic and not acting like his usual self
Unknown	Unknown	Now on Epipen and levetiracetam which we used to give him now and then before a fit, but not on one every 8 hours • Fits started of as around 8 or 9 clusters every 21 days, and this has increased to 11, his last one being 16 clusters from 2pm to 7 am the next day. Some last 30 to 40 seconds, some 2 or 3. There is usually 15 minutes in-between but now a few minutes. Clenches jaw, then jaw wide, outstretched legs urinates sometimes, and a slaver from mouth and the smell is awful. Then he will pace, used to be pace for 20 minutes, and could not see us. Now he paces and tends not to bang into objects, seems to manoeuvres around them a little better. Before a fit, he howls at the moon, tries to escape, but now he tends to approach me to cuddle, and follow me everywhere I go. You can see in his eyes that he is due to fit, his personality changes. The fits had increased to double the amount, but more oftem between them . Neutered before fits started. He had been neutered only 4 weeks before • He had trauma to his leg when only 5 months • And we had a collie put when he ceased the following week

Born 10/12/2002

Added to database 10.02.13

Zigzest Jaffa at Taliswood	Greatglen Hiawatha	Source Breeder & Owner: Suzanne & John Taylor
	Zigdan Zest	Details Fitting began aged 4 years 7 months. Vet confirmed as Epilepsy. Medication: Initially given Phenobarbitone, 60mg 2x daily. continued to cluster fit, medication was increased to 90mg 2x daily and given potassium bromide, 975mg once daily. The potassium bromide later caused disorientated mental status and occasional falling while standing or walking. Once the potassium bromide was withdrawn and replaced by gabapentin he was back to his normal alert self. Currently on 105mg Phenobarbitone 2x daily and 300mg 3x times daily of gabapentin. When he fits he is given rectal diazepam and an ice pack is applied to his neck/back area. now fits approx. every 10 to 15 weeks and generally only has one fit instead of the 4/5/6 cluster fits within the space of 1 to 4 hours he was having every 4 to 6 weeks. Neutered after being diagnosed with idiopathic epilepsy. Neutering made no difference to the pattern of his fitting. The dam was spayed and the owners of his litter brothers and sisters were advised to neuter/spay which all did. Our dog is the only one from the litter from this parentage that has fitted out of 11 puppies. They are now 10 years old and all are healthy.

**Tragility Ruggine [D] [BC]**

Born 10/03/2010

Added to database 15.03.15

Tragility Diamond Dazzler	Bluella Woodman	Source	Owner: Mr & Mrs Newham
	Bluella Bewitched	Details	Fitting began aged 4 years 7 months. Vet confirmed as Epilepsy. Medication: Epiphen 60mg twice daily - first prescribed 29.12.14 .
Canen Avanti at Tragility	Canen Russ (ISDS 247239)		He had a bad ear infection and was sedated then anaesthetised where his ear was flushed. We originally thought he had something in his ear as he was head shaking. With the drug Epiphen in his system the fits are less severe though still as debilitating but not for such a long period. He was neutered before the fits began. He had a retained testicle- removed early on then a benign lump in the remaining testicle/overgrowth of hormonal cells. the testicle was removed in 2013. He is on Green Dog Turkey and Rice kibble and has always been on this food. It has never been changed
	Haze (ISDS 249932)

### Waggerland Of Nod [D] [BC]

Born 10/09/2005

Added to database 19.01.15

Dusters Magic Mischief	Forever Magic Mischief	Source	Owner: Jenny Holt
	Waggerland Red Duster	Details	Fitting began aged 6 years. Vet confirmed as Epilepsy. Medication: Epiphen 60 mg twice a day. Rate of fits have decreased. Had 3 very short fits to begin with. Since medication very well controlled and lucky enough to say two a year. My dog was spayed at a year old so well before the onset of his epilepsy

### What's it All About Alfie [D] [WS]

Born 23/5/1985

Added to database 09.01.13. Updated 20.10.13

Joyces Jodie	Sealight Soyuki	Source	Owner : Carol Curtis
	Kathmick Fawn	Details	Fitting began aged 18 months. Vet confirmed as Epilepsy. Medication: Initially Potassium Bromide & one other. After about 1 year started to cluster, with increasing frequency. Went on to Phenobarbital which helped for a few months, then clusters returned increasing frequency. Entire. Given sleep just after 3rd birthday due to unstoppable cluster fits.

### Wispa (ISDS 262353) [B] [BC]

Born 28/08/2007

Added to database 25.07.14

Bryning Quillan (ISDS 283594)	Astra Ghost (ISDS 260359)	Source	Owner : Marilyn Foulds
	Canen Molly Malone By Bryning (ISDS 261520)	Details	Fitting began aged 3 years 8 months. Vet confirmed as Epilepsy. Medication: Epiphen, Libromide. Nothing unusual happened that might have caused fitting to start. She was being fed on dry food, now on Chappie. Fits are happening more often and are more severe. Neutered, but didn't make any difference to the fits.

## UK BC Fitting Database

### Wyndsend Maurice Traveller [D] [WS]

Born 03/12/1990

Added to database 11.09.13

Monkfield Minstral JW	Sh Ch Melodor Flint at Dykebar	Source	Owner : Liz Lyddiatt
	Sh Ch Whenway Janita of Monkfield	Details	Fits began aged 8 months. Vet confirmed as Epilepsy. Medication: initially vallium and Phenobarbitone. Then Potassium Bromide and epilim added after specialist advice. Doses systematically increase which increased the space between fits but did not reduce the intensity when the cluster fits happened.
Caristan Charisma	Sh Ch Caristan Captain	These required large doses of iv vallium and Phenobarbitone for 12 hours. iv dexamethasone was given the following day and subcutaneously the next 2 days. No changes made to diet. First few were single fits then every fit was a cluster fit. Response to increased medication doses was to increase the time between fits. There were no fits between Feb and June 92 then the intensity got increasingly worse. Neutered on Vets advice, but made no impact on fits. Euthanised in July 1992 when fit frequency increased to less than 1 week between clusters and the drugs were affecting his liver. His personality also changed and he lost the ability to remember simple commands.	
	Rossacre Joanna of Mobella		

Dog named above: Sire: 17 puppies in 3 litters (source: Anadune); 17 puppies in 3 litters (source: KC)

Dog named above: Dam: 6 puppies in 1 litters (source: Anadune); 7 puppies in 2 litters (source: KC)

### Zanyway Fools Gold [D] [WS]

Born 1/4/2002

Added to database 06.01.13

Laetare Master Class	Sh Ch Brooksbid Country Classic	Source	Owner: Alison Caldwell-Nicholls (supported by Breeder Karen Pudney)
	Croxlea Margaret at Laetare	Details	Fits began age 7 months. Vet confirmed as Epilepsy. Medication: began after 4 months of increasing clusters. Meds stabilised at 90mg Epiphen 2x daily + 325mg Potassium Bromide 2x daily. Fits varied in intensity from infrequent/partial to sever & clusters. Neutered age 12 months as Cryptorchid. No effect on seizures. Euthanised aged 5.5 years due to Liver failure from increasing levels of Epiphen. Born into a litter of 4, Mum & siblings neutered when diagnosed as Epileptic.
